

ACG GROUND AWARENESS TRAINING

An introductory training course for open pit personnel

Exciting
new training
course!

Various Australian states have auditable requirements for ground awareness training.

The Australian Centre for Geomechanics is excited to present the open pit mining community with a new, highly interactive training course for mine workers.

As the mining industry continues to experience a downturn, budgets for all activities, including continuing education and training, are under increased scrutiny, but mine safety is never compromised.

The training is conducted in Perth to allow people to gain basic ground awareness skills before arriving onsite without interfering with production. Custom training can be undertaken inhouse, if required. We offer a cost-effective vehicle to train a significant number of mine operators at a reasonable cost.

Who should attend:

Everyone who works in or around an open pit mine, including: geologists, samplers, geotechnical and hydrogeological personnel, machine operators, supervisors, safety representatives, surveyors, drill and blast, maintenance, site-based administration and support staff.

It includes all personnel who visit the pit, waste dumps or stockpiles.

Content and Assessment:

The training course covers geotechnical hazard recognition, fall of ground, waste dumps and stockpiles, drop-offs, voids, scaling, rock support and reinforcement principles.

Attendees will be assessed for competence and awarded a certificate on completion of the course. Topics can be adapted to meet individual site requirements.

PROGRAMME**	
08:30	REGISTRATION
09:00	Welcome and introduction
09:05	Course overview
09:15	Session 1 - The mining cycle
09:45	Session 1 - Assessment
10:15	MORNING BREAK
10:30	Session 2 - Open pit hazards
11:00	Session 2 - Assessment
11:30	Session 3 - Rock slope behaviour
12:00	Session 3 - Assessment
12:30	LUNCH
13:30	Session 4 - Dumps, stockpiles, roads, and ramps (Part 1)
14:00	Session 4 - Assessment
14:30	Session 5 - Dumps, stockpiles, roads, and ramps (Part 2)
15:00	Session 5 - Assessment
15:30	AFTERNOON BREAK
15:45	Questions/discussion
16:15	Certificate presentation
16:30	CLOSE

Book now!

Registration fees will be based on the number of delegates per company/organisation.

If you'd like to make a booking, or find out more, email us at events-acg@uwa.edu.au or call us on +61 8 6488 3300.

**Programme can be tailored to suit site requirements.

ACG GROUND AWARENESS TRAINING

An introductory training course for
open pit personnel

Presenter:

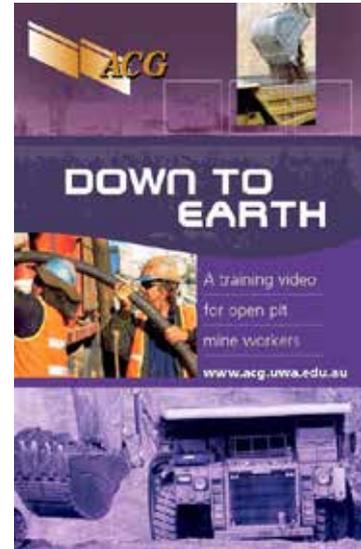

Dale Luke
Engineering Geologist
Australian Centre for Geomechanics

Dale has 23 years' experience in underground and open pit mining including extensive consulting experience in Australia and overseas.

Dale's experience includes underground mining in high stress and seismic conditions, open pit mining in a variety of terrains, including: high rainfall and earthquake prone areas, infrastructure development, construction of tailings storage facilities, paste fill, and feasibility studies.

Dale is currently working on a MRIWA sponsored research project with The University of Western Australia.

ACG Ground Awareness Course Ibis Hotel, Perth

	Pricing	
Standard	<input type="checkbox"/>	660
3-5 Delegates	<input type="checkbox"/>	550
6-10 Delegates	<input type="checkbox"/>	440
11+ Delegates	<input type="checkbox"/>	330

All prices include GST

Pricing is per delegate, inclusive of catering and course material, and is discounted based on the number of delegates per company/organisation.

Email expressions of interest to events-acg@uwa.edu.au and we will contact you to confirm your booking.

This highly interactive training course features geotechnical hazard awareness applicable to open pit operations. The ACG seeks to build upon the skills and knowledge of mining operators and industry practitioners and assist operations to improve mine safety and production performance. For more than two decades, the ACG has been at the forefront of providing practical training in ground awareness and ground control in Australian open pit mines.

The ACG is a not-for-profit mining research organisation, aiming to ensure safer working environments for all resources (human and capital) and add value to this most important of Australian industries.

We would be delighted to tailor for your company an introductory ground awareness training programme designed to provide basic ground awareness training to operator-level staff or those new to open pit mining.
