

T A B L E O F C O N T E N T S

INTRODUCTION

Potvin Y., Hadjigeorgiou J. and Stacey T.

SECTION 1 *Risk and Safety*

- CHAPTER 1** Risk as a Rock Engineering Design Criterion. T.R. Stacey, University of the Witwatersrand, South Africa; P.J. Terbrugge, SRK Consulting, South Africa; J. Wesseloo, Australian Centre for Geomechanics, Australia.
- CHAPTER 2** Geotechnical Engineering Management Considerations for Mining Operations at Depth. D. Gaudreau, BHP Billiton Nickel West, Australia.
- CHAPTER 3** Deriving a Code of Practice for the Design and Implementation of Deep and High Stress Tunnelling in AngloGold South African Region. J.J. Laas, AngloGold Ashanti Ltd, South Africa.
- CHAPTER 4** The Risks to Miners, Mines and the Public Posed by Large Seismic Events in the Gold Mining Districts of South Africa. R.J. Durrheim, CSIR Natural Resources and the Environment, South Africa; R.L. Anderson, California Seismic Safety Commission, USA; A. Cichowicz, Council for Geoscience, South Africa; R. Ebrahim-Trollope, GeoHydroSeis c.c., South Africa; G. Hubert, Golder Associates Pty Ltd, South Africa; A. Kijko, Council for Geoscience, South Africa; A. McGarr US Geological Survey, USA; W.D. Ortlepp, SRK Consulting, South Africa; N. van der Merwe, University of Pretoria, South Africa.
- CHAPTER 5** A Methodology to Quantify Risk and an Application to Remnant Mining. M.J. Cockram and E.O. Makinen, Goldfields Ltd, South Africa, H.A.D. Kirsten, University of Johannesburg, South Africa.
- CHAPTER 6** Quantification and Management of Risk in a Deep Mining Environment — Harmony Gold Mining Company Ltd Approach. M.J. Pretorius, Harmony Gold Mining Company Ltd, South Africa.
-

SECTION 2 *Planning and Design*

- CHAPTER 7** The N3500 Project — Deep, High Stress and Talc. K. Guilfoyle, Guilfoyle Engineering and Mining Services Pty Ltd, Australia; N. Slade and S. Kenworthy, Xstrata Copper, Mount Isa Copper Operations, Australia.
- CHAPTER 8** A Conceptual Sequence for a Block Cave in an Extreme Stress and Deformation Environment. D. Beck and S. Arndt, Beck Arndt Engineering, Australia; I. Thin and C. Stone, BHP Billiton Nickel West, Australia; R. Butcher, Barrick Gold of Australia Ltd.
- CHAPTER 9** The Selection and Implementation of the Materials Handling System at Kanowna Belle Gold Mine. A. Harris, LionOre Australia Ltd.
- CHAPTER 10** Forecasting and Controlling Pillar Instability at Mt Charlotte Mine. P.A. Mikula, Mikula Geotechnics Pty Ltd, Australia; M.F. Lee, AMC Mining Consultants Pty Ltd, Australia.
- CHAPTER 11** Design of a Pillar Support System Combining Stable and Yielding Pillars for Use with Mechanised Mining at Depth in the Bushveld. L.J. Gardner, Impala Platinum Ltd, South Africa.
- CHAPTER 12** Extraction of the Shaft Pillar on the VCR Horizon B — Kloof Main Shaft Complex. J. Maritz, P. Greyling and D. Geysler, Gold Fields South Africa Pty Ltd, South Africa.

- CHAPTER 13** The Extraction of Stressed Isolated Blocks of Ground at Harmony's South African Operations. K.R. Brentley and J. Lucas, Brentley, Lucas and Associates Pty Ltd Mining Consultants, South Africa.
- CHAPTER 14** Remnant Mining in South African Gold Mines. N. Singh, M.O. Kataka and A.M. Milev CSIR, South Africa; E.J. Sellers, African Explosives Ltd, South Africa.

SECTION 3 Strategies and Tactics in Deep and High Stress Mining

- CHAPTER 15** The DeepMine and FutureMine Research Programmes — Knowledge and Technology for Deep Gold Mining in South Africa. R. Durrheim, CSIR Natural Resources and the Environment, South Africa.
- CHAPTER 16** Feasibility Studies and Economic Models for Deep Mines. P. McCarthy, AMC Consultants Pty Ltd, Australia.
- CHAPTER 17** Gwalia Deeps — Strategic Planning Issues for a Deep Mine. R. Cooper, BHP Billiton, Australia.
- CHAPTER 18** Mine Sequencing for High Recovery in Western Australian Mines. D. Beck, Beck Arndt Engineering, Australia.
- CHAPTER 19** Kambalda Nickel Operations — Mining in High-Stress, Seismically Active Conditions. G. Sweby, Gold Fields Australia Pty Ltd, Australia.
- CHAPTER 20** Strategic and Tactical Approaches for Mining at Depth at Xstrata's Craig Mine. B.P. Simser, Xstrata Nickel, Canada.
- CHAPTER 21** Expansion at Depth at Agnico-Eagle's LaRonde Division — Meeting Geotechnical Challenges Without Compromising Production Objectives. F. Mercier-Langevin and P. Turcotte, Agnico-Eagle Mines Ltd, LaRonde Division, Canada.
- CHAPTER 22** Developing through a Highly Stressed Dyke at INCO's Garson Mine. Y. Krynicki, P. Eng, J.D.P. O'Donnell, Sr. and P. Geo, INCO Ltd, Canada; D. Wheeler, J.S. Redpath Ltd, Canada.
- CHAPTER 23** Negotiating the Master Bedding-Plane Fault at 1 East Shaft Driefontein Gold Mine — A Case Study. F.J. Castelyn, G. Nell, S. Durapraj and H. Mills, Driefontein Consolidated, South Africa.
- CHAPTER 24** The Combination of Layout, Design, Support and a Quality Control Programme to Assist in the Long-Term Stability of Tunnels in a Deep Level Gold Mine. P.R. Brenchley, AngloGold Ashanti Ltd, South Africa; J.D. Spies, AngloGold Ashanti Ltd, South Africa.
- CHAPTER 25** Strategies to Manage Seismicity in a Deep VCR Environment on Mponeng (1995–2003). R.B. McGill, AngloGold Ashanti Ltd, South Africa.

SECTION 4 Observations, Monitoring and Modelling

- CHAPTER 26** Loading System Stiffness — A Parameter to Evaluate Rockburst Potential. T. Wiles, Mine Modelling Pty Ltd, Australia.
- CHAPTER 27** Geomechanical Challenges at Xstrata Nickel's Thayer Lindsley Mine. G. Maybee and A. Sampson-Forsythe, Xstrata Nickel, Canada; L. Cotesta and C. O'Connor, Itasca Consulting Canada Inc., Canada.
- CHAPTER 28** Ground Control Challenges at Mine Doyon – A Case History. V. Falmagne, Golder Associates Pty Ltd, Canada; P. Frenette, Agnico-Eagle Technical Services, Canada.
- CHAPTER 29** Impact of Rockburst Damage Upon a Narrow Vein Gold Deposit in the Eastern Goldfields, Western Australia. J. Slade, URS Australia Pty Ltd, Australia; B. Ascott, Newmont Asia Pacific, Australia.
- CHAPTER 30** A Seismic and Modelling Analysis of Dip-Pillar Mining. S. Spottiswoode, CSIR Miningtek, South Africa.
- CHAPTER 31** Stability of Tunnels in a Seismically Active Deep Level Mining Environment. Shaun Murphy, AngloGold Ashanti Ltd, South Africa.
- CHAPTER 32** Numerical Modelling of Seismogenic Development During Cave Initiation, Propagation and Breakthrough. D. Beck, F. Reusch and S. Arndt, Beck Arndt Engineering, Australia; I. Thin and C. Stone, BHP Billiton Nickel West, Australia; M. Heap, Argyle Diamonds, Australia; D. Tyler, BHP Billiton Diamonds and Speciality Products, Canada.
- CHAPTER 33** Stope Closure as a Diagnostic Measure of Rock Behaviour in Deep Level Mines. D.F. Malan, Groundwork Consulting Pty Ltd, South Africa.

- CHAPTER 34** Data-Driven Simulation of the Rock Mass Response to Mining – Part 1: Laboratory Experiments Using Nepean Sandstone Models®. R.J. Durheim, CSIR Natural Resources and the Environment, South Africa; D. Labrie, Canmet Mining and Mineral Sciences Laboratories, Canada.
- CHAPTER 35** Data-Driven Simulation of the Rock mass Response to Mining — Part 2: Numerical Modelling of the “Room and Pillar” Experiment. R.J. Durheim, CSIR Natural Resources and the Environment, South Africa; D. Labrie, Canmet Mining and Mineral Sciences Laboratories, Canada.

SECTION 5 Ground Support

- CHAPTER 36** The Use of Geomechanical Instrumentation in Cost Control in Underground Mining. W.F. Bawden, University of Toronto, Canada; J. Tod, Mine Design Technologies Inc., Canada; P. Lausch Mine Design Technologies Inc., Canada; G. Davison, Mining One Pty Ltd, Australia.
- CHAPTER 37** Ground Support Design and Performance under Strong Rockburst Conditions. W.F. Bawden, University of Toronto, Canada; S. Jones, Williams Operating Corporation, Canada.
- CHAPTER 38** Ground Support Systems for High Stress Conditions — Theory versus Experience. G. Swan, S. Carlisle, G. Maybee, C. Pritchard, A. Sampson-Forsythe, B. Simser and D. Counter, Xstrata Copper, Canada.
- CHAPTER 39** Field Behaviour and Failure Modes of Modified Conebolts at the Craig, LaRonde and Brunswick Mines in Canada, B. Simser et al.
- CHAPTER 40** Controlling Extreme Ground Deformation — Learning From Four Australian Case Studies. Y. Potvin, Australian Centre for Geomechanics, Australia; N. Slade, Xstrata Copper, Mount Isa Mines, Australia.
- CHAPTER 41** Current Ground Support Practices at Perseverance Mine. D. Gaudreau. BHP Billiton Nickel West, Australia.
- CHAPTER 42** A Model to Forecast Rockburst Damage. J. Albrecht, AMC Consultants Pty Ltd, Australia; G. Sharrock, University of New South Wales, Australia.
- CHAPTER 43** Analysis of Support Behaviour During a Rockburst. M. Van Sint Jan, Pontificia Universidad Católica de Chile, Chile; E. Rojas, Codelco, Chile; S. Boldrini, Pilotes Terratest, Chile.
- CHAPTER 44** Performance of Swellex Rock Bolts Under Dynamic Loading Conditions. F. Charette, Atlas Copco MAI, Austria.
- CHAPTER 45** Large Scale Testing of Stope Support Systems under ‘Realistic’ Rockburst Conditions. J.L. Human and W.D. Ortlepp, SRK Consulting, South Africa.
- CHAPTER 46** Dynamic Testing of Rockburst Support for Tunnels. W.D. Ortlepp and A.H. Swart, SRK Consulting, South Africa.
- CHAPTER 47** Yielding Rock Support — The Capacities of Different Types of Support, and Matching of Support Type to Seismic Demand. T.R. Stacey, School of Mining Engineering, University of the Witwatersrand, South Africa; W.D. Ortlepp, SRK Consulting,, South Africa.

SECTION 6 Seismological Analyses

- CHAPTER 48** A Seismic Hazard Scale for Mining and its Application to Western Australian Mines. M. Hudyma and Y. Potvin, Australian Centre for Geomechanics, Australia.
- CHAPTER 49** The Mine Seismicity Risk Analysis Program (MS-RAP) — Transforming Microseismic Data into Rock Engineering Knowledge. M.R. Hudyma, Itasca Consulting Canada Inc., Canada; Y. Potvin and D. Heal, Australian Centre for Geomechanics, Australia
- CHAPTER 50** Monitoring the Onset of Seismicity. M. Turner, Turner Mining and Geotechnical Pty Ltd, Australia; D. Beck, Beck Arndt Engineering, Australia.
- CHAPTER 51** Characterisation of the Caving Front at Ridgeway Mine, New South Wales, Based on Geomechanical Data and Detailed Microseismic Analysis. C-I. Trifu and V. Shumila, ESG, Canada; N. Burgio, Stratavision, Australia.

- CHAPTER 52** Investigation of Rock Mass Stability through the Analysis of Failure Components of Microseismicity at Darlot Gold Mine, Australia. C-I. Trifu and V. Shumila, ESG, Canada; D. Chen, Sino Guizhou Jinfeng Mining Ltd, China.
- CHAPTER 53** The Mechanism of a Rockburst — An Informative Study. D. Ortlepp, SRK Consulting, South Africa; S. Murphy, AngloGold Ashanti Ltd, South Africa; G. van Aswegen, ISS International Ltd, South Africa.
- CHAPTER 54** Quantifying and Interpreting Microseismicity. R. P. Young and D. S. Collins, University of Toronto, Canada; J. Hazzard, RocScience, Canada; J.M. Reyes-Montes, Applied Seismology Consultants Ltd, UK; C. Baker, CRU Strategies, UK.

SECTION 7 *Blasting*

- CHAPTER 55** A Rock Engineering Systems Approach to Destress Rock Blasting. P. Andrieux and R. Brummer, Itasca Consulting Canada Inc., Canada; J. Hadjigeorgiou, Université Laval, Canada.
- CHAPTER 56** The Destressability Index for the Design of Large-Scale Choked Destress Blasts in Mine Pillars — Application to the Fraser Mine 42-1-080 Destress Blast. P. Andrieux Itasca Consulting Canada Inc., Canada; J. Hadjigeorgiou, Université Laval, Canada; A. Sampson-Forsythe, Xstrata Nickel, Fraser Mine, Canada.
- CHAPTER 57** Application of Mass-Blast Principle for Stope Blasting in Deep Mines. K.Q. Liu, Xstrata Nickel, Technical Services, Canada; P. Larouche, Agnico-Eagle Ltd, Division LaRonde, Canada; S.D. Tolgyesi, Xstrata Nickel, Kidd Creek Mine, Canada; S. Roberge, Xstrata Nickel, Brunswick Mine, Canada.
- CHAPTER 58** Destressing/Preconditioning to Control Rockbursts in South African Deep-Level Gold Mines. A.Z. Toper, TWP Australia Pty Ltd, Australia.

SECTION 8 *Ventilation*

- CHAPTER 59** The Ventilation Challenge — A Canadian Perspective on Maintaining a Good Working Environment in Deep Mines[®]. S.G. Hardcastle and C.K. Kocsis, Natural Resources Canada, CANMET-MMSL Sudbury, Canada.
- CHAPTER 60** Exposure Limits for Work Performed In Canada's Deep Mechanised Metal Mines. J. Maté, University of Ottawa, School of Human Kinetics, Canada; S.G. Hardcastle, Natural Resources Canada's Mining and Mineral Sciences Laboratories (MMSL), Canada; F.D. Beaulieu, G. Kenny and F.D. Reardon, University of Ottawa, School of Human Kinetics, Canada.
- CHAPTER 61** Continued Development of a Process Simulation Approach to Determine Airflow Requirements in the Optimal Design of a Ventilation System[®]. S. Hardcastle and C. Kocsis, Natural Resources Canada's Mining and Mineral Sciences Laboratories (MMSL), Canada; Y. Bissiri and G. Baiden, Penguin Automated Systems Inc., Canada.
- CHAPTER 62** Cooling of Deep Mines — The Role of Energy Recovery. A. Kramers, TWP Consulting, South Africa; M. Butterworth, Bluhm Burton Engineering, South Africa.
- CHAPTER 63** Heat Stress Management in Deep and Hot Mines. P.C. Schutte and W.M. Marx, CSIR, South Africa.
- CHAPTER 64** Selective Mine Cooling. A.P. Kramers and M. Biffi, CSIR Miningtek, South Africa.
- CHAPTER 65** A Demand Strategy versus a Supply Strategy for Ventilation, Cooling and Pumping Requirements for Deep Mines. R.C.W. Webber-Youngman, University of Pretoria, South Africa; C. Swart, Optimine International, South Africa.
- CHAPTER 66** Dry-Air Cooling. M.G. Thom and M.D. Butterworth, CSIR, South Africa.

SECTION 9 *Comprehensive Case Studies*

South Deep Mine

CHAPTER 67	South Deep Regional Pillar Modelling Part I — Design of Regional Pillars at South Deep Gold Mine. W.C. Joughin, SRK Consulting, South Africa; S.Z. Pethö, South Deep Gold Mine, South Africa.
CHAPTER 68	South Deep Gold Mine Regional Pillar Modelling Part II — Non-Linear Modelling of the Pillar Behaviour. J. Wesseloo, The Australian Centre for Geomechanics, Western Australia; W.J. Joughin, SRK Consulting, South Africa.
CHAPTER 69	South Deep Regional Pillar Modelling Part III — Towards a Methodology for Determining Seismic Risk Associated with Deep Tabular Mining. W.C. Joughin and J.J. Thompson, SRK Consulting, South Africa; S.Z. Pethö, South Deep Gold Mine, South Africa.
CHAPTER 70	Low-Angle Stress Fracturing in Destress Stopes at South Deep Mines. M. Delpont and S.Z. Pethö, South Deep Gold Mine, South Africa; W.C. Joughin SRK Consulting, South Africa.
 Junction Mine	
CHAPTER 71	A Case Study of Management of High Stress and Seismicity at Junction Mine. T. Li and U. Singh, Newcrest Mining Ltd, Australia; J. Coxon, Lionore Australia Ltd, Australia.
CHAPTER 72	Back Analysis of a Crown Pillar at Junction Gold Mine. Part I: Quantifying Rock Mass Deformation using Seismic Monitoring and Geotechnical Instrumentation. U. Singh, Newcrest Mining Ltd, Australia; R. Lachenicht, Barrick Gold of Australia Ltd, Australia.
CHAPTER 73	Back Analysis of a Crown Pillar at Junction Gold Mine. Part II: Integrating the Rock Mass Deformation Interpreted from Seismicity into Numerical Simulation. R. Lachenicht, Barrick Gold of Australia Ltd, Australia; U. Singh, Newcrest Mining Ltd, Australia.
 Savuka Mine	
CHAPTER 74	Strategy Change in the 31 Line West on the VCR Horizon at Savuka Mine. L.J. Scheepers, AngloGold Ashanti Ltd, South Africa.
CHAPTER 75	Development Through the BV 78 Dyke at Savuka Gold Mine. R. Carstens, AngloGold Ashanti Ltd, South Africa.
