COMMITTEES

---

FOREWORD

---

PREFACE

---

ACKNOWLEDGMENTS

---

PROCEEDINGS SPONSOR

---

## **PLENARIES**

Addressing the Risk of Major TSF Failures

Richard Jewell

---

Study of Mineralogical Properties that Affect the Process of Thickening Tailings: Project Talabre Thickened Tailings

Andres Palma, Claudia Urrea, Gonzalo Caro and Paolo Maldonado

---

## **CHAPTER 1**

### **THICKENING**

Thickened Tailings Management, a Dynamic Process: Understanding and Optimizing the Thickener Operation

Klas Strömberg

---

Laboratory Studies of Two End of Pipeline Treatment Technologies: Observations and Challenges

Adrian Knight and Fiona Sofrà

---

Case study: Reprocessing Tailings Pond and Sub-Aqueous Deposition as Part of a Coal Mine Reclamation

Ben Booth, Jerold Johnson and David Henry

---

Impact of Test Work Campaigns in the Evolution of the Design of a Thickening and Transport Tailings System

David Benavente, David Romo and Ray Martinson

---

A Revolution in Paste Plant Design

Mathew Revell and Richard Pearce

---

Reform of DCT to Prevent Raking Halt based on Fluidized Bed Analysis

Aixiang Wu, Haiyong Cheng, Hongjiang Wang, Shenghua Yin, Sijing Cai and Cuiping Li

---

“What about 15 % passing 20  $\mu\text{m}$ ?” Dispelling the Myths and Rules for Paste with Testing and Examples

Andrew Hall, Frank Palkovits and Elio Tomini

---

Prediction of Non-Newtonian Fluids Pressures in Discharge Hoppers

Miguel Rosas, Helard Alvarez and Misael Ore

---

Management of Paste Tailings in Chile: A Review of Practical Experience and Environmental Acceptance

Carlos Cacciuttolo and Agustín Holgado

---

Slurry Densification Through Hydrocyclones: An Alternative to Conventional Processes

Javier López and Milton Mogollones

---

## **CHAPTER 2**

### **FILTERING**

Innovation in Tailings Dam Embankment Construction Using Residue Filled Geosynthetic Tubes

Morné Breytenbach, Marie-Therèse Van Kessel and Markus Wilke

---

New Developments and Operating Experiences with High Performance Disc Filters for Tailings Dewatering

Jürgen Hahn and Andre Egger

---

Optimization of Tailings Management Schemes: Comparison of Tailings Filtration and Paste

Arash Roshdieh, Keith Seddon and Carlos Pavissich

---

Tailings Filtration Demonstration Plant

Fred Schoenbrunn, Todd Wisdom, Reuben Neumann and James Chaponnel

---

## **CHAPTER 3**

### **RHEOLOGY**

Design and Commissioning of the Cooke 2 Shaft Backfill Reticulation System

Bernardt van der Spuy, Jaco Snyman and Jonathan Steinmann

---

Implementation of Tailings Rheology in a Predictive Open-Channel Beaching Model

Arno Talmon, Jill Hanssen, Johan Winterwerp, Luca Sittoni and Cees van Rhee

---

## **CHAPTER 4**

### **SLURRY CHEMISTRY**

Development of Novel Techniques to Enhance the Mechanical Performances of Paste Backfill

Mohamed Mangane, Rabei Argane, Mostafa Benzaazoua and Romain Trauchessec

---

Influence of Polymer Molecular Weight in Low and High Solids Tailings Applications

Allan Costine, James Cox, Shaun Travaglini, Alex Lubansky, Phillip Fawell and Holger Misslitz

---

The Benefits of Incorporating Admixtures into Mine Paste Backfill

Fabian Erismann, Shawn O'Hara, Christophe Kurz and Martin Hansson

---

Novel Hyperbranched Functionalized Polyethylenes for the Treatment of Oil Sands Tailings

Linda Botha, Diógenes Vedoy and João Soares

---

Filtering Mature, Fine Tailings Flocculated with Single and Dual Anionic/Cationic Polymers

Diógenes Vedoy, Linda Botha and João Soares

---

## **CHAPTER 5**

### **TAILINGS SLURRY TRANSPORT**

Novel Paste Pipeline Depressurization Device to Allow Safe Depressurization of Cemented Paste Backfill Pipelines

Chris Lee

---

Centrifugal Pump Performance when Handling Non-Newtonian Slurries with Different Particle Sizes and Densities

John Furlan, Robert Visintainer and Anders Sellgren

---

Resistance Control of Paste Gravity Delivery in Deep Mine Backfilling

Wensheng Lyu, Peng Yang, Sijing Cai, Hongwei Mu, Chao Yang and Changyuan Ma

---

Alternative Method for Transport Design of Bingham Plastic Fluids in Open Channels

Alejandro Vera and Cecilia Riveros

---

Ductile Iron Pipes for Industrial Applications: New Solutions for the Mining Industry

Steffen Ertelt and Francisco Mendez

---

High-density Slurry Transportation using Centrifugal Pumps: Control and limits.

NUTRAM Case.

Pedro Valencia, Ricardo Abarca and Jorge Casanova

---

## **CHAPTER 6**

### **TAILINGS BEACH SLOPE**

A Hydraulically Improved Beach Slope Model

Tim Fitton

---

Thickened Tailings Discharge: Spigot Spacing and the Merging of Streams

Tim Fitton

---

Slurry Flow in Self-Formed Channels on Tailings Beaches

Andrew Chryss, Lachlan Graham and Krishna Mohanarangnam

---

Tailings Beach Slope Forecasting: An Empirical Model

Hugo Quelopana

---

Utilizing CFD for Predicting Post Failure Run-Out Distances of Thickened Tailings Deposits

Huiting Liu, Jinglong Gao, Andy Fourie and Scott Draper

---

Application of Fluidized Bed Column Testing to the Assessment of Beaching and Segregation

Characteristics of Mine Tailings

Gordon McPhail, Jon Engels and Roxana Ugaz

---

## **CHAPTER 7**

### **TESTING**

Evaluation of Laboratory Scale of Tailings Thickening Test

Raymond Guang, Andres Quintero and Sue Longo

---

Deposition Modeling of Amended Oil Sands Tailings Accounting for Thixotropy

Shabnam Mizani, Paul Simms and Ward Wilson

---

Cyclic Shear Response of Fine-Grained Thickened Tailings

Gonzalo Suazo and Andy Fourie

---

Field Analysis of Dryness of a Fine Bauxite Tailings Using a Test Area

Giovani Pedrosa, Otilio Pires, Aldo Lenz and Anderson de Dutra e Cerceau

---

**CHAPTER 8**  
**CASE STUDIES**

Paste Backfill at the San José Silver Mine, Mexico

David Stone, Kenneth Pearson and José Pacora

---

Tailings Central Thickened Discharge: Challenges Faced and Lessons Learned from Design to Operation

Juan Moreno and Nicholas Thompson

---

Why the Design of Experiments Matters for Successful Mine Backfill Recipes

Corina Aldea and Bruce Cornelius

---

Design and Operational Experience of the Animon High Density Tailings Deposit, Peru

José Lara and Roberto Maldonado

---

Remote Sensing Techniques to Characterize Tailings Deposition Behavior to Improve Daily Planning and Provide Early Warning Systems

Jon Engels and Francisco Vega

---

Considerations for a High-Thickened Tailings System with Large Tonnage and High Pumping Requirement

David Romo, David Benavente, Lars Martinson and Ray Martinson

---

Reconstruction and Optimization of the Backfill System for Underground Deep Mining in Xincheng Gold Mine, China

Di Wu, Sijing Cai, Peng Yang and Yongliang Zhang

---

Thickened Tailings Disposal Technology Experiences in Chile

Raúl Espinace, Gabriel Villavicencio and Andy Fourie

---

Importance of Geotechnical Operational Control of Thickened Tailings Deposits

Raúl Espinace, Gabriel Villavicencio, Andy Fourie and Juan Torrejón

---

A Coupled Large Strain Consolidation: Unsaturated Flow Model for Subaerially Deposited Tailings Management

Shunchao Qi and Paul Simms

---

Liquefaction and Stability Assessment of a Thickened Tailings Slope Based on Field and Laboratory Testing

Franklin Olaya, Renmin Pretell and Rafael Luna

---

Stability Considerations for Thickened Tailings due to Freezing and Thawing

Roger Knutsson, Peter Viklander and Sven Knutsson

---

Water and Tailings Management Costs in NICO's Copper Concentrator Development Projects

Ehsan Karamad and Hamid Seyf

---

Case study: Comparison of Net Operational Costs and NPV of Project Investment Between HCSD and LCSD

Charilos Karambalis

---
