# TABLE OF CONTENTS

Australian Centre for Geomechanics ...............................................................................................................iii
Flow Process Research Centre, Cape Peninsula University of Technology ......................................................iv
Committees ........................................................................................................................................................v
Preface ..............................................................................................................................................................vii
Foreword ............................................................................................................................................................ix
Sponsors ............................................................................................................................................................xi

## Session 1: Environmental

**Keynote Address**  
Making an Unsustainable Industry More Sustainable ................................................................. 3  
*D.V. Boger & B.C. Hart, Department of Chemical and Biomolecular Engineering, University of Melbourne, Australia*

**Keynote Address**  
Climate Change and Paste — Perceptions, Challenges and Opportunities ................................. 15  
*D. Lesolle, Department of Meteorological Services, Botswana*

Water Recovery from Slimes on Debswana’s Mines ........................................................................ 23  
*D. Stephenson & P. Odirile, University of Botswana, Botswana*

Debswana’s Current and Future Water Management Challenges in Botswana ................................. 29  
*M.C. Brook, Debswana Diamond Company, Botswana*

Prediction of the Infiltration from Thickened Tailings to the Natural Ground ................................. 39  
*J. Moreno & M. Palape, SRK Consulting Chile S.A., Chile*

Influence of Admixtures on Paste Behaviour and the Role of Surface Area on Remobilisation .............. 51  
*J.S. Mahlaba, P.C. Pretorius & M.P. Augustyn, SASOL Technology R&D (Pty) Ltd, South Africa*

## Session 2: Thickening

**Keynote Address**  
The Heart of Thickener Performance ................................................................................................. 63  
*R.A. Triglavcanin, Outotec Pty Ltd, Australia*

Underflow Rheology Optimisation to Enhance Thickener Performance ............................................. 83  
*S.J. Adkins, Ciba UK PLC, United Kingdom*

Sizing Paste Thickeners from Pilot and Laboratory Data ........................................................................ 97  
*I. Arbuthnot, Outotec Pty Ltd, Australia*

The Debswana Prototype Paste Thickening Campaign — A Case Study ............................................. 103  
*N. Dambe & M. Cooks, Debswana Diamond Mining Company, Botswana, A.J. Vietti, Paterson and Cooke, South Africa, B. Busani & J. Dodo, Debswana Diamond Mining Company, Botswana*
The Effect of Water Quality on Dewatering Properties of Debswana Kimberlitic Ores

K. Ntshabele, M. Cooks, B. Busani and J. Dodo, Debswana Diamond Mining Company, Botswana

Paste Thickener Operation of Fine Coal Tailings

S. Slottee & J.L. Johnson, PasteThick Associates, United States of America

Modelling the Effect of Pre-Concentration and Paste Thickening on Water Usage for the Processing of Platinum Ores

H. Dong & A.L. Hinde, Council for Mineral Technology (Mintek), South Africa

Session 3: Surface Disposal

Keynote Address
Surface Disposal of Paste and Thickened Tailings — A Brief History and Current Confronting Issues

M.P.A. Williams, K.D. Seddon & T.G. Fitton, Australian Tailings Consultants, Australia

State of Practice for Tailings Thickening in the State of Nevada, USA

B.F. Ulrich, Knight Piésold and Co., United States of America

Alternatives to Paste Disposal with Lower Water Consumption

K.A. Lyell, Consulting Engineer, South Africa, A.M. Copeland, Anglo Technical Division, South Africa & G.E. Blight, University of the Witwatersrand, South Africa

Prediction of the Beach Profile of High-Density Thickened Tailings from Rheological and Small-Scale Trial Deposition Data

G.I. McPhail, Metago Environmental Engineers (Australia) Pty Ltd, Australia

Esperanza Project — Drivers for Using Thickened Tailings Disposal

D. Luppnow, SRK Consulting, Australia, J. Moreno, SRK Consulting Chile S.A., Chile & L. Bernal, Antofagasta Minerals PLC, Chile

Rheomax™ Modified Tailings Disposal at Welbeck Colliery

M. Brumby & J. Brough, UK Coal, United Kingdom, I. Flanagan, Ciba UK plc, United Kingdom

Electrokinetic Strengthening of Tailings

J. Lamont-Black, D.T. Huntley & C.J.F.P. Jones, Electrokinetic Ltd, United Kingdom, S. Glendinning & J. Hall, Newcastle University, United Kingdom

Session 4: Transport

Paste and Thickened Tailings and the Impact on the Development of New Rheological Techniques

D.V. Boger & P.J. Scales, Department of Chemical and Biomolecular Engineering, University of Melbourne, Australia, F. Sofra, Rheological Consulting Services Pty Ltd, Australia
Laminar Sheet Flow of Paste Material .........................................................................................................237
*R. Haldenwang & P.T. Slatter, Cape Peninsula University of Technology, South Africa & R.P. Chhabra, Indian Institute of Technology, India*

Non-Newtonian Open Channel Flow — A Simple Method of Estimation of Laminar/Turbulent Transition and Flow Resistance ........................................................................................................245
*T.G. Fitton, Australian Tailings Consultants, Australia*

Turbulent Pipe Flow of Yield Plastic Fluids ..................................................................................................... 253
*D.J. Hallbom, Pipeline Systems Incorporated, Canada*

Design of a Thickened Tailings Pumping and Distribution System for the Esperanza Project ........................................................................................................................................ 267
*M. Vega, JRI Ingenieria S.A., Chile*

Thickened and Paste Tailings Pumping Systems for Orapa Mine .......................................................................275
*M. Keevy, Paterson and Cooke, United States of America, B. Busani, Debswana Diamond Company, Botswana & R. Cooke, Paterson and Cooke, United States of America*

Use of Fly Ash to Treat Acid Mine Drainage Before Use in Backfill Operations .................................................. 285
*V.G. Fester & P.T. Slatter, Cape Peninsula University of Technology, South Africa, V.R.K. Vadapalli & L. Petrik, University of the Western Cape, South Africa*

Description of Non-Intrusive Sonar Array-Based Technology and its Application to Unique and Difficult Slurry and Paste Flow Measurements .................................................................................. 299
*C.V. O’Keefe, R.J. Maron, P.J. Rothman & J. Poplawski, CiDRA Corporation, United States of America*

**Session 5: Case Studies**

Design Considerations for the Big Gossan 300 Tonnes per Hour Paste Backfill Plant System .......................................................... 317
*E. Ansah-Sam, C. Lee, Golder Paste Technology Ltd, Canada & S. Hewitt, PT Freeport Indonesia, Indonesia*

Integration of Paste Management Within a Mining Project to Respond to Operational and Permitting Needs — The Aguas Teñidas Mine in Southern Spain ....................................................................327
*G. del Pozo, F. Fimbres, Minas de Aguas Teñidas SA, Spain, S. Wilson, Golder Paste Technology (Europe) Ltd, United Kingdom, A. Gutierrez del Olmo & A. Darby, Golder Associates Ibérica, Spain*

Tailings Disposal at Quebrada Honda Toquepala ...............................................................................................337
*B. Serpa & H.J. Walqui, Southern Peru Copper Corporation, Peru*

Rheomax™ and Water Conservation at Orapa Mine .............................................................................................. 353
*A.J. Vietti, Paterson and Cooke Consulting Engineers, South Africa, R. Cooke, Paterson and Cooke Consulting Engineers, United States of America, K. Ntshabele, M. Cooks & B. Busani, Debswana Diamond Company, Botswana*
Case Study on Challenges Experienced by BCL Concentrator on Thickened Tailings Disposal .......................................................................................................................... 365

J. Makamba & G.P.T. Dzinomwa, BCL Ltd, Botswana

Sandfill Operations — Challenges and Benefits to BCL Ltd..........................................................................................................................371

M. Gumbie, W.Z. Giwa, M. Moroka, M. Bogopa & G.P.T. Dzinomwa, BCL Ltd, Botswana

Ciba® Rheomax™ ETD Technology Evaluation on Chrome Thickener Underflow for Enhanced Tailings Management ..........................................................................................................................377

R.R. Daubermann & Z. Földvári, Senmin International Pty Ltd, South Africa
