Deposition

3 Towards an integrated approach to tailings management
   A. Chryss, CSIRO Process Science and Engineering, Australia; A.B. Fourie, School of Civil and Resource Engineering, The University of Western Australia, Australia; A. Mönch, D. Nairn, CSIRO Process Science and Engineering, Australia; K.D. Seddon, ATC Williams Pty Ltd, Australia

11 Measurements on freshly-deposited surfaces of two platinum tailings dams
   G. Blight, University of the Witwatersrand, South Africa; A. Copeland, Anglo American Mining and Technology, South Africa; P. Jardine, Fraser Alexander Tailings, South Africa; C. MacRobert, Anglo American Mining and Technology, South Africa

25 Tailings initial consolidation and evaporative drying after deposition
   A.L. Li, URS Pty Ltd, Australia; K. Been, J. Wislesky, Golder Associates Ltd., Canada; T. Eldridge, Golder Associates S.A., Chile; D. Williams, Golder Associates Pty Ltd, Australia

43 Accelerated consolidation of soft clays and mine tailings using a desktop centrifuge
   D. Reid, School of Civil and Resource Engineering, The University of Western Australia, Australia; and Golder Associates Pty Ltd, Australia; A.B. Fourie, School of Civil and Resource Engineering, The University of Western Australia, Australia; S. Watson, Formerly School of Civil and Resource Engineering, The University of Western Australia, Australia

53 KEYNOTE: Perceived and realised benefits of paste and thickened tailings for surface deposition
   A.B. Fourie, School of Civil and Resource Engineering, The University of Western Australia, Australia

65 Thickened tailings water balance – dealing with excess water
   J. Moreno, J. Martin, D. Luppnow, SRK Consulting Australia, Australia

73 Contribution of desiccation to monotonic and cyclic strength of thickened gold tailings – not the same as over-consolidation
   F. Daliri, H. Kim, P. Simms, S. Sivathayalan, Carleton University, Canada

85 Putting beach slope prediction into perspective
   R.J. Jewell, Australian Centre for Geomechanics, The University of Western Australia, Australia

93 Important considerations in the testing of high density tailings for beach profile prediction
   G.I. McPhail, SLR Consulting Australia (Pty) Ltd, Australia; M. Becerra, ASMIN, Chile; S. Barrera, ARCADIS, Chile

Thickening and dewatering

105 Design and development of a novel thickener feedwell using computational fluid dynamics
   T.V. Nguyen, CSIRO Mathematical and Information Sciences, Australia; J.B. Farrow, CSIRO Process Science and Engineering, Australia; J. Smith, Anglo American Mineral Processing, South Africa; P.D. Fawell, CSIRO Process Science and Engineering, Australia

121 RadFlow™ – the next generation feedwell
   A. Krassnokutski, Roymec Technologies (Pty) Ltd, South Africa

129 A new approach to fine solids dewatering
   C.St.J. Lowe, Weir Minerals Australia, Australia
Thickener experiences at Langer Heinrich Mine
M. Cooks, D. Mostert, L. Coetzee, D.J. van Schalkwyk, Langer Heinrich Uranium (Pty) Ltd, Namibia

Polymers

The effects of synthetic flocculants on some geotechnical properties of kaolin clay
D. Reid, School of Civil and Resource Engineering, University of Western Australia, Australia; and Golder Associates Pty Ltd, Australia; A.B. Fourie, School of Civil and Resource Engineering, University of Western Australia, Australia

Flocculant testing through the application of experimental design techniques and the application of a flocculant pipe reactor
M. Cooks, B. Plaatjies, Langer Heinrich Uranium (Pty) Ltd, Namibia

BASF novel flocculant technology in dynamic thickening operation
S. Adkins, A. Berger, BASF Construction Polymers GmbH, Germany; J. Muhor, G. Brodt, BASF SE, Germany; I. Flanagan, BASF Performance Products plc, United Kingdom

Case studies

Evaluation of the behaviour of high density tailings deposition – CODELCO pilot plant
J. Engels, Knight Piésold S.A., Chile; G.I. McPhail, SLR Consulting Australia (Pty) Ltd, Australia; R. Jamett, Knight Piésold S.A., Chile; C. Pavissich, CODELCO-VP, Chile

Thickened tailings – a water and energy consumption perspective
J.H.L. Möller, A.J.C. Paterson, Paterson & Cooke, South Africa; T. Verbeek, Anglo American Kumba Iron Ore, South Africa

Thickening of tailings using hydrocyclones operating under vacuum conditions
G.J. van Ryssen, Cyclone Projects and Consulting, South Africa; P.L. Steenkamp, AngloGold Ashanti Ltd, Senegal

Application of hydrocyclone technology to TSFs to reduce water consumption
M.A. Knight, J.A. Wates, Fraser Alexander Tailings, South Africa; I. Du Plessis, Multotec, South Africa; and Hatch, South Africa

Khumani Iron Ore Mine paste disposal and water recovery system
T. Du Toit, Assmang Ltd, South Africa; M. Crazier, WesTech Process Equipment Africa Pty Ltd, South Africa

Mine backfill

Defining and quantifying sustainable backfill
D. Green, Admixture Systems, BASF, USA; Z. Martic, MEYCO Global Underground Construction, Switzerland; B. Knight, MEYCO Global Underground Construction, Canada; J. Jones, Admixture Systems, BASF, USA

Pipeline transport and rheology

Relating Atterberg limits to rheology
T.G. Fitton, K.D. Seddon, ATC Williams Pty Ltd, Australia

Advances in thickened tailings pumping using centrifugal pumps
A. Sellgren, Luleå University of Technology, Sweden

The performance of centrifugal pumps when pumping ultra viscous paste slurries
J. Crawford, FLSmidth Krebs, United States of America; F. van Sittert, M. van der Walt, Paterson & Cooke Consulting Engineers, South Africa

Advanced diaphragm pumps with unique technical and commercial quality rating for operating pressures up to 500 bar
H.M. Nägel, FELUWA Pumpen GmbH, Germany
325  Paste pumping with rolling rotor design peristaltic hose pump  
    J. Häkkinen, Flowrox Oy, Finland; A. Clark, Flowrox Inc., United States of America; W. Chabant, Flowrox Pty (Ltd), South  
    Africa; S. Sims, Flowrox Oy, Finland

333  Transport pilot tests on thickened tailings to determine the effect of pumping distance on tailings sedimentation  
    P. Chacón, S. Barrera, ARCADIS, Chile

343  Solids transport of non-Newtonian slurries in laminar open channel flow  
    R.H. Hernández, LEAF-NL, Departamento de Ingeniería Mecánica, Universidad de Chile, Chile; R.H. Fuentes, J.R.I.  
    Ingeniería, Chile

359  Author Index
