# Table of Contents

iii  Australian Centre for Geomechanics  

v  Committees  

vii  Technical Reviewers  

ix  Preface  

xi  Sponsors  

---  

**Keynote addresses**  

3  Kidd Mine – dealing with the issues of deep and high stress mining – past, present, and future  
   
   **DB Counter, Glencore Canada Corp., Canada**  

23  Has research and development contributed to improvements in safety and profitability of deep South African mines?  
   
   **RJ Durrheim, University of the Witwatersrand and CSIR, South Africa**  

41  The continuing challenge to provide adequate ventilation and a safe environment in deep mines  
   
   **SG Hardcastle, Natural Resources Canada, Minerals and Metals Sector, CanmetMINING, Canada**  

---  

**Plenary session**  

57  Towards continuous bulk production from below 2.5 km  
   
   **D Morrison, H Parsons, A Akerman, Centre for Excellence in Mining Innovation, Canada**  

65  Mitigation strategies for mining in high stress sill pillars at Coleman Mine – a case study  
   
   **S Townend, A Sampson-Forsythe, Vale Canada Ltd., Canada**  

79  Practical applications of a rockburst database to ground support design at LaRonde Mine  
   
   **P Turcotte, Agnico Eagle Mines Ltd., Canada**  

93  4D data management and modelling in the assessment of deep underground mining hazard  
   
   **WI McGaughey, Mira Geoscience Ltd., Canada**  

107  Seismic risk and hazard management at Kidd Mine  
   
   **NV Disley, Glencore Canada Corp., Canada**  

123  Observational studies of the rock mass response to mining in highly stressed gold mines in South Africa  
   
   **H Ogasawara, Ritsumeikan University, Japan; M Nakatani, The University of Tokyo, Japan; RJ Durrheim, CSIR and University of the Witwatersrand, South Africa; M Naoi, Kyoto University, Japan; Y Yabe, H Moriya, Tohoku University, Japan; GF Hofmann, C Stander, DP Roberts, P de Bruin, J Oelofse, AngloGold Ashanti, South Africa; H Kato, 3D Geoscience, Japan; A Cichowicz, D Birch, D Ngobeni, Council for Geoscience, South Africa; A Milev, T Kgarume, CSIR, South Africa; T Satoh, Geological Survey, Japan; S Horiiuchi, Home Seismo, Japan; H Kawakata, O Murakami, Ritsumeikan University, Japan; N Yoshimitsu, The University of Tokyo, Japan; AK Ward, J Wienand, P Lenegan, Sibanye Gold, South Africa; H Yilmaz, S Mngadi, University of the Witwatersrand, South Africa; PS Piper, TN Clements, Groundwork Consulting, South Africa; S Nakao, Kagoshima University, Japan; M Okubo, H Ishii, Toho Research Institute of Earthquake Science, Japan; AV Visser, Open House Management Solutions, South Africa**  

139  Rock support testing in Luossavaara-Kiirunavaara AB’s underground mines, Sweden  
   
   **E Swedberg, F Thyni, J Töyrä, Luossavaara-Kiirunavaara AB, Sweden; A Etzenberger, Luleå University of Technology, Sweden**  

151  Analysis and numerical modelling of dynamic ground support based on instrumented full-scale tests  
   
   **A Roth, Geobrugg AG, Switzerland; M Cala, AGH University of Technology and Science, Poland; R Brändle, Geobrugg AG, Switzerland; E Rorem, Geobrugg North America, USA**  

165  The influence of change in mining and ground support practice on the frequency and severity of rockbursts  
   
   **P Morissette, J Hadjigeorgiou, University of Toronto, Canada; AR Punkkinen, DR Chinnasane, Vale Canada Ltd., Canada**  

---  

**Case studies**  

181  A comparison of shallow and deep mining  
   
   **T Anderson, KGHM International Ltd., Canada**  

---

Deep Mining 2014, Sudbury, Canada  

xiii
Ground support

227 Deformation-based support selection for tunnels in strainburst-prone ground
PK Kaiser, Laurentian University, Canada

241 The operational and laboratory aspects of a thin spray-on liner
PK Boeg-Jensen, Luossavaara-Kiirunavaara AB, Sweden; G Swan, Rock Mechanics & Mine Design, Canada

253 Load-deformation behaviour of a deformable rockbolt and accessories under dynamic loading
FC Charette, Normet Canada Ltd., Canada; AJ Hyett, Yieldpoint Inc., Canada; B Voyzelle, T Anderson, Natural Resources Canada, Minerals and Metals Sector, CanmetMINING, Canada

263 Development in deep, hard rock mines – beyond 10 m/day
DM Morrison, A Akerman, H Parsons, Centre for Excellence in Mining Innovation, Canada

271 Ultra rapid strength development in dry-mix shotcrete for ultra rapid support in challenging mining conditions
J-D Lemay, M Jolin, Université Laval, Canada; R Gagné, Université de Sherbrooke, Canada

281 Development of a rapid strength gain dry-mix shotcrete using calcium sulfo-aluminate cement for mining and tunnelling applications
SReny, N Ginouse, King Packaged Materials Company, Canada

291 Examples of ground support practice in challenging ground conditions at Vale’s deep operations in Sudbury
MYao, A Sampson-Forsythe, AR Punkkinen, Vale Canada Ltd., Canada

305 Use of cable bolts to reinforce the hanging pillars and improve the ore recovery when stopes are mined using double top sills at Vale’s Copper Cliff Mine
DR Chinnasane, M Knutson, A Watt, Vale Canada Ltd., Canada

315 Enlightening bolts
AJ Hyett, Yieldpoint Inc., Canada; FC Charette, Normet Canada Ltd., Canada; BJ Forbes, Queens University, Canada; AC Engbretson, Yieldpoint Inc., Canada

329 Economic and productivity comparison of ground support for rockburst prone and squeezing ground conditions
LJ Hayman, Coffey International Ltd, Australia

Numerical modelling

345 Empirical and numerical investigation on the behaviour of foliated rock masses under high stress conditions
EKarampinos, J Hadjiigeorgiou, University of Toronto, Canada; PTurcotte, MM-Drolet, F Mercier-Langevin, Agnico Eagle Mines Ltd., Canada

363 Mine-scale numerical modelling, seismicity and stresses at Kiirunavaara Mine, Sweden
JVatcher, Luleå University of Technology, Sweden; SD Mckinnon, Queen’s University, Canada; JSjöberg, Itasca Consultants AB, Sweden

377 Numerical modelling and scientific visualisation – integration of geomechanics into modern mine designs
LCotesta, COP’Connor, RK Brummer, Itasca Consulting Canada Inc., Canada; AR Punkkinen, Vale Canada Ltd., Canada

395 Stability investigations around a tunnel in an iron mine through 3D discontinuum and continuum stress analyses
PHSW Kulatilake, X Wang, University of Arizona, USA; W Song, University of Science and Technology Beijing, China

409 The effect of the presence of salt formations above extracted copper ore as determined by numerical modelling
BPańac-Walko, Wrocław University of Technology, Poland; WPytel, KGHM CUPRUM CBR, Poland

421 Use of 3DEC to study spalling and deformation associated with tunnelling at depth
TVGarza-Cruz, MPierce, Itasca Consulting Group, Inc., USA; PKaiser, Laurentian University, Canada
Monitoring

437 Wireless monitoring of geotechnical and hydrology instrumentation using the battery-powered MineHop network
A Dulmage, M Trenwith, Mine Design Technologies Inc., Canada; A Cervinka, Newtrax Technologies Inc., Canada

443 Determining the feasibility of a real time geophysical magnetic and electric measurement system for monitoring strain underground – laboratory magnetic test
C Schaub, R Smith, Laurentian University, Canada

457 Numerical study of grout–rock mass interaction effect on distributed optical fibre sensor measurements
B Majdabadi, University of Waterloo, Canada; B Valley, ETH Zürich, Switzerland; MB Dusseauit, University of Waterloo, Canada; PK Kaiser, Laurentian University, Canada

Planning and design issues

471 Assessment of stope sequence alternatives in a diminishing ore pillar
S Shnorhokian, HS Mitri, McGill University, Canada; L Moreau-Verlaan, Vale Canada Ltd., Canada

485 Towards mining schedule optimisation constrained by geomechanics
N Saeidi, D Millar, L Fava, M Cai, MIRARCO, Laurentian University, Canada

499 Translating new knowledge into practical and effective tools for geotechnical risk and database management in deep high stress mines
DJ Duff, Centre for Excellence in Mining Innovation, Canada

513 Strain rock energy approach to the optimisation of rock drilling processes
HE Munoz, A Toheri, E Chanda, C Xu, The University of Adelaide, Australia; D Grant, BHP Billiton, Australia; L Franca, CSIRO/DET CRC, Australia

525 Investigation of stope blast designs in a deep underground mine through vibration analysis
B Mohanty, D Zwaan, L Trivino, University of Toronto, Canada

533 Lightweight skips – factors influencing operational reliability
S Gorzalczynski, Wabi Iron & Steel Corp., Canada

545 Feasibility of Acti-Gel® as a cost-effective additive for underground mine hydraulic backfill applications
K Tary, L Bedard, Natural Resources Canada, Minerals and Metals Sector, CanmetMINING, Canada; F Malek, Vale Canada Ltd., Canada; H Kim, Active Minerals International LLC, Canada

559 Effect of deep mine temperature conditions on the heat development in cemented paste backfill and its properties
M Fall, University of Ottawa, Canada; D Wu, China University of Mining & Technology-Beijing, China; M Pokharel, University of Ottawa, Canada

575 Microgeneration of electricity using mine drainage – a proposal for deep mines
JM Salamanca, JIN Merchán, DAB Castañeda, Pedagogical and Technological University of Colombia, Colombia

Rock mechanics

587 Geostatistical interpolation of estimated RQD values and its use in geomechanics design considerations – a case study
AK Verma, M Yao, Vale Canada Ltd., Canada

601 Estimation of in situ stress using the memory technique for deep mining
PM Dight, Australian Centre for Geomechanics, The University of Western Australia, Australia; BG Tarasov, Centre for Offshore Foundation Systems, The University of Western Australia, Australia; A Hsieh, Australian Centre for Geomechanics, The University of Western Australia, Australia; AV Dyskin, School of Civil, Environmental and Mining Engineering, The University of Western Australia, Australia

615 The Sudbury Basin stress tensor – myth or reality?
FT Suorineni, The University of New South Wales, Australia; F Malek, Vale Canada Ltd., Canada

Seismicity

629 Strainburst hazard awareness for development miners
RR Lyle, SJ Wrixon, A Price Jones, Cementation Canada Inc., Canada
Ventilation

741 Overcoming high temperature water ingress in deep shaft mining
MT Swanson, Cementation USA, Inc., USA; TM Goodell, Rio Tinto, USA

757 Liquid air for energy storage, auto-compression, compressed air and ventilation in deep mining
DL Cluff, GA Kennedy, PJ Foster, University of Exeter, UK

771 Radon progeny in Ontario’s non-uranium underground mines
APE Dirige, Laurentian University, Canada

783 Conciliating ventilation requirements and geomechanical requirements for deep mining
D Thibodeau, J Jodouin, Stantec, Canada

793 Pathway mapping of airflow delivery to the production areas in underground mine ventilation systems
GG Li, SG Hardcastle, CNatural Resources Canada, Minerals and Metals Sector, CanmetMINING, Canada

801 Theoretical determination of the number of adits and cross-sectional area for the airflow requirements of the New Level Mine Project
El Acuña, G Soto, Codelco Chile, Chile

813 Considering ventilation on demand for the developments of the New Level Mine Project, El Teniente
El Acuña, A Feliú, Codelco, Chile

825 Author Index
