

# Table of Contents

iii	Australian Centre for Geomechanics
v	Technical Reviewers
vii	Foreword
ix	Sponsors
1	<b>Keynote Address:</b> Progress and challenges in some areas of deep mining <i>E.T. Brown, Golder Associates Pty Ltd, Australia</i>

## Ground support

---

27	Validating a support performance database based on passive monitoring data <i>P. Morissette, J. Hadjigeorgiou, Lassonde Institute of Mining, University of Toronto, Canada; D. Thibodeau, Mines and Mill Technical Services, Vale Ltd., Canada</i>
41	Functional specifications for in-stope support based on seismic and rockburst observations in South African mines <i>R.J. Durrheim, CSIR Centre for Mining Innovation; and University of the Witwatersrand, South Africa</i>
57	Performance of dynamic support system in highly burst-prone ground conditions at Vale’s Copper Cliff Mine – a case study <i>D.R. Chinnasane, M. Yao, D. Landry, P. Paradis-Sokoloski, Vale Canada, Canada</i>
71	Progress with empirical performance charting for confident selection of ground support in seismic conditions <i>P.A. Mikula, Mikula Geotechnics Pty Ltd, Australia</i>
91	Mechanisms of rockbolt support in jointed rock masses <i>T. Moyo, University of the Witwatersrand, South Africa; and Xstrata Zinc, Australia; T.R. Stacey, University of the Witwatersrand, South Africa</i>
105	A study of the behaviour of fully grouted rockbolts subjected to dynamic loading in underground mining <i>A. Mortazavi, F. Tabatabae Alavi, Department of Mining and Metallurgical Engineering, Amirkabir University of Technology, Iran</i>
117	Use of Yield-Lok bolts as conveyor belt hanging system in seismic areas <i>Y.K. Wu, Barrick Gold Corporation, Canada; R. Gagnon, Jennmar of Canada Inc., Canada</i>

## Seismic monitoring

---

129	<b>Keynote Address:</b> Managing seismicity at the Tasmania Mine <i>P.B. Hills, BCD Resources (Operations) NL, Australia</i>
149	Beyond coloured balls – making sense of large volumes of microseismic data with diverse source mechanisms <i>W. de Beer, Golder Associates (NZ) Ltd, New Zealand; J.A. Ardito, MINSUR S.A., Peru; J-P. Mercier, Golder Associates Ltd., Canada; and Advanced Geosciences Imaging Solutions Ltd., Canada; V. Falmagne, Golder Associates Ltd., Canada</i>
161	Discrimination of blasts in mine seismology <i>D. Malovichko, Institute of Mine Seismology, Australia</i>
173	Establishment of SATREPS experimental sites in South African gold mines to monitor phenomena associated with earthquake nucleation and rupture <i>R.J. Durrheim, SATREPS, CSIR Centre for Mining Innovation, South Africa; and University of the Witwatersrand, South Africa; H. Ogasawara, SATREPS, Ritsumeikan University, Japan; M. Nakatani, SATREPS, Earthquake Research Institute, Tokyo University, Japan; Y. Yabe, SATREPS, Tohoku University, Japan; H. Kawakata, SATREPS, Ritsumeikan University, Japan; M. Naoi, SATREPS, Tokyo University, Japan; A.K. Ward, First Uranium, South Africa; S.K. Murphy, AngloGold Ashanti, South Africa; J. Wienand, KDC Goldfields, South Africa; P. Lenegan, Goldfields, South Africa; A.M. Milev, SATREPS, CSIR Centre for Mining Innovation, South Africa; O. Murakami, SATREPS, Ritsumeikan University, Japan; N. Yoshimitsu, Ritsumeikan University, Japan; T. Kgarume, SATREPS, CSIR Centre for Mining Innovation, South Africa; A. Cichowicz, SATREPS, Council for Geoscience, South Africa</i>

- 189 Shear slip indication at Big Gossan Mine  
*H. Arbi, E. Riyanto, R. Rabbani, L. Meiharrik, PT Freeport Indonesia, Indonesia*
- 201 Active seismic monitoring  
*R.A. Lynch, Institute of Mine Seismology, Australia*
- 211 Kanowna Belle – evolution of seismicity with increasing depth in an ageing mine  
*R. Varden, H. Esterhuizen, Barrick Kanowna Ltd, Australia*

## Stress and structures

---

- 231 An investigation of the effects of joint roughness on the stability of underground openings subjected to dynamic loading  
*A. Mortazavi, Department of Mining and Metallurgical Engineering, Amirkabir University of Technology, Iran*
- 239 Hydraulic fracturing for in situ stress measurements – a simulation and experimental study  
*V. Rasouli, Department of Petroleum Engineering, Curtin University, Australia*
- 247 High-resolution fracture recognition from seismic data – applying oil and gas technology to mining  
*R.H.J. Oppermann, OPptimal Exploration and Development Pty Ltd, Australia*

## Planning and design

---

- 259 **Keynote Address:** Where do the data come from?  
*J. Hadjigeorgiou, Lassonde Institute of Mining, University of Toronto, Canada*
- 279 The design and construction of water impounding plugs using sprayed concrete  
*U. Singh, Stratacrete Pty Ltd, Australia; P. Abraham, E. Bellamy, A. Swart, Newcrest Mining Ltd, Australia*
- 297 Challenges in multiple sill pillar mining at Vale's Coleman Mine  
*O.N.S. Beruar, M. Yao, A. Sampson-Forsythe, Vale Canada, Canada*

## Fundamental rock mechanics

---

- 313 Absolute, relative and intrinsic rock brittleness at compression  
*B.G. Tarasov, Centre for Offshore Foundation Systems, The University of Western Australia, Australia; Y. Potvin, Australian Centre for Geomechanics, The University of Western Australia, Australia*
- 325 System of trustworthy deformational precursors of highly stressed rock samples failure  
*V.V. Makarov, L.S. Ksendzenko, V.V. Gnitenko, A.M. Golosov, N.A. Opanasiuk, A.A. Opanasiuk, Far Eastern Federal University, Russia*
- 339 Non-Euclidean model for description of rock  
*M.A. Guzev, Institute for Applied Mathematics, Far Eastern Branch of the Russian Academy of Sciences; Far Eastern Federal University, Russia*

## Numerical modelling

---

- 347 Visualisation of elastic numerical modelling results for effective mine planning and design  
*K. du Plooy, SRK Consulting, Australia; F. Basson, Newmont Asia Pacific, Australia*
- 357 Numerical analysis of alternative mining sequences to minimise the potential for fault slip rockbursting  
*J. Sjöberg, F. Perman, Itasca Consultants AB, Sweden; C. Quinteiro, L. Malmgren, C. Dahnér-Lindkvist, M. Boskovic, LKAB, Sweden*
- 373 Explicit discontinuum simulation for probabilistic forecasting of fault slip and rock mass seismic potential  
*D. Beck, Beck Engineering Pty Ltd, Australia; V. Levkovitch, Beck Engineering, Germany; B. Simser, Xstrata Nickel Ltd., Canada*
- 389 Application of the limit equilibrium strength to the seismic assessment of shear related seismicity  
*J. Jarufe Troncoso, Codelco VP Chile, Chile; and The University of Western Australia, Australia; Y. Potvin, J. Wesseloo, Australian Centre for Geomechanics, The University of Western Australia, Australia*

- 401 Determination of rock mass failure and rock mass damage criteria for the felsic norites at Nickel Rim South Mine  
*E. Karampinos, Lassonde Institute of Mining, University of Toronto, Canada; B. Simser, Xstrata Nickel Ltd., Canada; J. Hadjigeorgiou, Lassonde Institute of Mining, University of Toronto, Canada*
- 415 Numerical analysis of stress field distribution and blasting-induced rockburst at Hongtoushan Copper Mine  
*X.D. Zhao, College of Resources and Civil Engineering, Northeastern University, China; and State Key Laboratory for Geomechanics and Deep Underground Engineering, China University of Mining and Technology, China; J. Liu, College of Resources and Civil Engineering, Northeastern University, China*

## **Caving methods**

---

- 431 How does a caved rock mass behave under confined gravity flow?  
*M.A. Fuenzalida, R.L. Castro, Mining Engineering Department and Advanced Mining Technology Center, University of Chile, Chile*
- 443 Finding zones of stress concentrations and seismic events in deep ore mining affected by high horizontal stresses  
*V.A. Eremenko, A.A. Eremenko, L.N. Gakhova, I.V. Klishin, Institute of Mining, Siberian Branch, Russian Academy of Sciences, Russia*

## **Ventilation**

---

- 453 Energy management of refrigeration systems within deep mines in South Africa  
*R. Wilson, S. Bluhm, L. van den Berg, BBE Consulting, South Africa*
- 463 Refrigeration and cooling system design – a case study  
*W. Marx, M. Bezuidenhout, BBE Consulting, South Africa; L. van den Berg, BBE Consulting, South Africa; and Snowden Mining Industry Consultants, Australia; P. Botha, G. Meredith, Palabora Mining Company Ltd, South Africa*

## **Drilling technology**

---

- 475 Adapting oil and gas downhole motors for deep mineral exploration drilling  
*A. Mokaramian, V. Rasouli, Department of Petroleum Engineering, Curtin University; and Deep Exploration Technologies CRC, Australia; G. Cavanough, CSIRO, Queensland Centre for Advanced Technologies; and Deep Exploration Technologies CRC, Australia*
- 487 A feasibility study on adopting coiled tubing drilling technology for deep hard rock mining exploration  
*A. Mokaramian, V. Rasouli, Department of Petroleum Engineering, Curtin University; and Deep Exploration Technologies CRC, Australia; G. Cavanough, CSIRO, Queensland Centre for Advanced Technologies; and Deep Exploration Technologies CRC, Australia*
- 503 Author Index
