Collaborating Organisations .....	iii
Technical Reviewers.....	v
International Organising Committee.....	ix
Preface.....	xi
Sponsors.....	xiii

## Mining and Civil

### Keynote Addresses

Estimating the Mechanical Properties of Rock Masses.....	3
<b>E.T. Brown, Golder Associates Pty Ltd, Australia</b>	
Rock Mechanics Challenges in Underground Construction and Mining .....	23
<b>P.K. Kaiser, Centre for Excellence in Mining Innovation, Canada</b>	
<b>B-H. Kim, Geomechanics Research Centre at MIRARCO – Mining Innovation, Laurentian University, Canada</b>	
Assessing Parameters for Computations in Rock Mechanics.....	39
<b>P.J.N. Pells, Pells Sullivan Meynink Pty Ltd, Australia</b>	
Forecasting Seismic Hazard in Mines.....	55
<b>A.J. Mendecki, ISS International Ltd, South Africa</b>	

### Section 1: Tunnelling

Ground Improvement by Jet Grouting Method in St. Kuzam Tunnel – Monitoring of Performance .....	73
<b>M.S. Kovačević, D. Jurić-Kaćunić, Ž. Arbanas and N. Petrović</b>	
Predicting Squeezing Potential Along the First 16 Kilometres of the Qomroud Long Tunnel Project in Iran Using Empirical Criteria.....	85
<b>A. Shafiei and M.B. Dusseault</b>	
Numerical Simulation of Rock Blasting in a Pipe-Jacking Project of China .....	103
<b>Y.L. Li, L.B. Chen, A.J. Xu, J.H. Wang and L.L. Zhang</b>	
Effects of Tunnelling on Existing Support Systems of Intersecting Tunnels in the Sydney Region .....	113
<b>H.Y. Liu, J.C. Small and J.P. Carter</b>	

### Section 2: Underground Mining Rock Mechanics

Are Design Codes Appropriate in Mining Rock Engineering?.....	129
<b>T.R. Stacey</b>	
Trident Mine Raisebore — A Bored Pile Case Study.....	137
<b>M. Sexton, P.A. Mikula and M.F. Lee</b>	
A Compilation of Dilution Graph Data for Open Stopes Hangingwall Design .....	149
<b>G. Capes and D. Milne</b>	
Results of the Radius Factor Stability Assessment Method for Design and Pillar Extraction at the Conqueror Mine, St Ives Gold Mine .....	163
<b>P.G. Andrews and B.J. Barsanti</b>	
Design of Stable Spans at Tau Lekoa Mine .....	179
<b>M.J. Dunn and T.R. Stacey</b>	
Effect of Binder Type and Proportion on the Short- and Long-Term Strength of Cemented Paste Backfill .....	193
<b>B. Ercikdi, F. Cihangir, A. Kesimal, H. Deveci and I. Alp</b>	

Rock Mechanics Practices and Experiences at Xstrata Mount Isa Copper Operations .....	201
<b>H.C.J. Esterhuizen, N. Slade and J.L. Sloane</b>	

### **Section 3: Caving**

3D Simulations of Block Caving Flow Using ESyS-Particle.....	221
<b>W.R. Hancock and D.K. Weatherley</b>	
Mine-Scale 3D Stress Model for the New Mine Level Project, El Teniente Mine, Codelco, Chile .....	231
<b>J. Jarufe and P. Vasquez</b>	
Analysis of Caving Behaviour Using a Synthetic Rock Mass – Ubiquitous Joint Rock Mass Modelling Technique .....	243
<b>B. Sainsbury, M.E. Pierce and D. Mas Ivars</b>	
The Isolated Extraction Zone in Block Caving – A Review.....	255
<b>G.B. Sharrock</b>	
A Review of Particle Percolation in Mining .....	273
<b>M.H.M. Hashim, G.B. Sharrock and S. Saydam</b>	

### **Section 4: Rock Foundations and Subsidence**

Estimation of Axial Force in PS-Anchors by a Magnetic Anisotropy Sensor .....	287
<b>S. Akutagawa, K. Morimoto, E. Nakamori, S. Mori and S. Baba</b>	
Lateral Load Capacity of Single Piles Socketed into Jointed Rocks – A Review.....	297
<b>W.L. Chong, A. Haque, P.G. Ranjith and A. Shahinuzzaman</b>	
Implications of Recent Mining Subsidence on Infrastructure in the Collie Basin, Western Australia .....	311
<b>I. Misich and R. Sherwood</b>	
Analysis of River Bed Cracking Above Longwall Extraction Panels in the Southern Coalfield of New South Wales, Australia .....	325
<b>D.P. Sainsbury</b>	

### **Section 5: Numerical Modelling**

Numerical Modelling of Mining Near and Beneath Tailings Dam.....	341
<b>M.A. Coulthard and G.E. Holt</b>	
Variability and Uncertainty on Rock Mass Strength Via a Synthetic Rock Mass Approach .....	355
<b>C. Lambert</b>	
Numerical Simulation of a Multi-Reef Tabular Mining Layout in a South African Platinum Mine .....	367
<b>J.A.L. Napier and D.F. Malan</b>	
Applying Numerical Modelling to Pillar Design in South African Mines – An Initial Study.....	379
<b>K. Naidoo, M.F. Handley and A.R. Leach</b>	
Modelling of Brittle Pillar Behaviour .....	391
<b>J.S. Kuijpers, D.P. Roberts and J.A.L. Napier</b>	

### **Section 6: Slopes**

STEPSIM4 Revised: Network Analysis Methodology for Critical Paths in Rock Mass Slopes .....	405
<b>N.R.P. Baczynski</b>	
Toppling Slope Failure – Predicted Versus Actual, Ok Tedi, Papua New Guinea.....	419
<b>N.R.P. Baczynski, I.K. Sheppard, K.J. Smith, P. Simbina and R. Sakail</b>	
Microseismic Monitoring of Hard Rock Mine Slopes .....	433
<b>J. Wesseloo and G.J. Sweby</b>	

Low Wall Slope Monitoring by Robotic Theodolite System Likely to Contribute to Increased Production of Coal in PT Adaro Indonesia .....	451
<b>S. Saptono, S. Kramadibrata, R.K. Wattimena, B. Sulistianto, P. Nugroho, E. Iskandar and S. Bahri</b>	

Rock Mass Stability in the Southern New England Fold Belt, New South Wales, Australia.....	459
<b>S.G. Fityus and J.H. Gibson</b>	

Quasi-Static and Dynamic Response of Energy Dissipators for Rockfall Protection .....	471
<b>A. Giacomini, G.P. Giani and M. Migliazza</b>	

A Generalised Time and Event Dependent Deformation Model for Unsupported Rock Slopes.....	481
<b>K.G. Mercer and T.R. Stacey</b>	

Behaviour of Engineered Slopes in Flysch Rock Mass.....	493
<b>Ž. Arbanas, M. Grošić and G. Briški</b>	

A Method for Rockfall Hazard Assessments – Chapmans Peak Drive, Cape Town, South Africa.....	505
<b>P. Schlotfeldt</b>	

The Influence of Non-Persistent Joints on the Failure Modes of Large Rock Slopes .....	517
<b>M.L. Van Sint Jan and M.G. Prudencio</b>	

## **Section 7: Rock Mechanics Data**

Data Acquisition with 3DM Analyst Mine Mapping Suite .....	531
<b>J. Birch</b>	

The Use of Borehole Breakout for Geotechnical Investigation of an Open Pit Mine .....	541
<b>M.J. Fowler and F.M. Weir</b>	

Geotechnical Modelling for Kimberlite Pipes .....	551
<b>D.B. Tyler and S.J. Godden</b>	

Geomechanics Parameters for Design and Planning of the Conceptual Engineering Chuquicamata Underground Mining Project.....	565
<b>F. Villegas A. and J. Díaz A.</b>	

## **Section 8: Risk, Rockfall and Ground Support**

Development of Industry-Friendly Rockbolts.....	579
<b>G.R. Davison</b>	

A Preliminary Model for Quantifying the Risk of Rockfalls and Evaluating the Benefits of Safety Spending .....	589
<b>W.C. Jougin</b>	

Rock Mass Characterisation of a Prospective Base Metal Deposit Using a Combined FracMan/ELFEN Approach .....	605
<b>N.T. Ford, T.R. Silverton and M.G. Cottrell</b>	

Tetrahedral Rock Wedge Stability Under Empirically Derived Support.....	619
<b>J. Ranasooriya and H. Nikraz</b>	

Tunnel Cave-In – Convergence Confinement and 2D Analysis .....	633
<b>Q.N. Trinh and E. Broch</b>	

State-of-the-Art Intersection Support in Coal Mines in the USA .....	641
<b>A.J.S. Spearing and A. Mueller</b>	

## **Section 9: Seismicity**

Self-Organising Map Analysis of Seismicity Associated with Mining at Mount Charlotte Mine .....	653
<b>P.A. Mikula, S.J. Fraser and M.F. Lee</b>	

Some Unique Statistical Properties of the Seismic Process in Mines.....	667
<b>S. Lasocki</b>	
Establishing a Methodology for the Assessment of Remnant Stability Using Recorded Seismic Events on Harmony Mines.....	679
<b>P.J. Le Roux and T.R. Stacey</b>	
Energy and Stiffness of Mine Models and Seismicity .....	693
<b>S.M. Spottiswoode, L.M. Linzer and S. Majet</b>	
Passive Seismic Monitoring of Thermal Cracking Induced by Underground Firing .....	709
<b>X. Luo</b>	
Author Index .....	715
