Fundamental and Petroleum

Keynote Addresses

Quantifying the Size Effect of Rock Mass Strength	3
<i>P.A. Cundall and M.E. Pierce, Itasca Consulting Group, USA</i>	
<i>D. Mas Ivars, Itasca Geomekanik, Sweden</i>	
Coupling Geomechanics and Transport in Petroleum Engineering	17
<i>M.B. Dusseault, University of Waterloo, Canada</i>	
New Insight into the Nature of Shear Rupture Propagation in Pristine Rocks and Pre-Existing Faults	37
<i>B.G. Tarasov, The University of Western Australia, Australia</i>	

Invited Speaker

Acoustic Emission Analysis of Initiation and Propagation of Faults in Brittle Rock and Compaction Bands in Porous Rock	69
<i>S. Stanchits, GeoForschungsZentrum Potsdam, Germany</i>	

Section 1: Fracture and Damage of Rocks

Effect of Grain Size and Thermo-Mechanical Properties of Minerals on Strength Reduction of Binary Ores Subjected to Microwave Radiation	85
<i>A.Y. Ali and S.M. Bradshaw</i>	
Rotational Mechanism of In-Plane Shear Crack Growth in Rocks Under Compression	99
<i>A.V. Dyskin and E. Pasternak</i>	
Ortlepp Shears – Dynamic Brittle Shears of South African Gold Mines	111
<i>G. van Aswegen</i>	
A Statistical Damage Constitutive Model of Brittle Rocks Based on Weibull Distribution	121
<i>J.G. Wang, S. Anand and F.J. Ye</i>	
Study of Subcritical Crack Growth and Long-Term Strength for Rock and Cementitious Material for Radioactive Waste Disposal	135
<i>Y. Nara, D. Mori, H. Owada and K. Kaneko</i>	
DEM Simulation of Rock Fragmentation and Size Distribution Under Different Loading Conditions	149
<i>Y.C. Wang and F. Alonso-Marroquin</i>	
Prediction of Long-Term Strength of Some Weak Rocks in Thailand	157
<i>K. Fuenkajorn</i>	

Section 2: Numerical Modelling

Assessing the Fracture of a Gravity Dam Under Earthquake Load Using a Mesh-Free Method	171
<i>R. Das and P.W. Cleary</i>	
Mesh Scalability Concept for Explicit Simulation of Rock Failure	185
<i>A.V. Dyskin and A. Caballero</i>	

Numerical Micro-Scale Modelling of Inter-Joint Swelling Pressure.....	195
G.A. Narsilio, D.W. Smith, A. Mohajeri and P. Pivonka	
Vibrating Screen Modelling with the Numerical Manifold Method	205
X.M. An, J.C. Li and G.W. Ma	
Wave Propagation and Attenuation Through Filled Rock Joints.....	215
J.C. Li, X.M. An and G.W. Ma	
Development and Geomechanical Substantiation of a Geotechnology for Rockburst-Hazardous Iron Ore Deposits in Siberia.....	229
A.A. Eremenko, V.A. Eremenko, A.P. Gaidin, I.F. Matveev, G.P. Ermak and Ya.N. Baiborodov	
Section 3: Reservoir Mechanics	
Coupled Strata and Gas Behaviour in the Co-Extraction of Coal and Methane	245
H. Guo, D.P. Adhikary, N. Ishihara and M. Fujioka	
Formation and Casing Shear During Injection and Production Activities.....	261
H. Han and M.B. Dusseault	
Modelling Pore Pressure/Stress Coupling	275
B.I.R. Müller, J.B. Altmann, A. Dorner, T.M. Müller and M.R.P. Tingay	
Stress Dependent Anisotropy in Shales – Measurements and Modelling	287
M. Pervukhina, D.N. Dewhurst, U. Kuila, A.F. Siggins and B. Gurevich	
Effect of Carbon Dioxide Injection on the Mechanical Properties of Synthetic Brown Coal	301
D. Jasinge, P.G. Ranjith, S.K. Choi and J. Kodikara	
Sensitivity Study of Geomechanical Effects on Reservoir Simulation.....	309
L.C. Pereira, L.J.N. Guimarães and F.O.L. Falcão	
Section 4: Injection, Production and Fracture	
Seismic Monitoring From Within the Stimulation Borehole of an Oil or Gas Reservoir.....	323
M. Albrecht and V. Mansurov	
Surface Weight Change Effect on Tilt Field and Hydraulic Fracture Inversion Accuracy.....	333
Z.R. Chen and R.G. Jeffrey	
On Intersection and Crossing of Frictional Interfaces by Hydraulic Fractures	347
X. Zhang and R.G. Jeffrey	
The Variable Rate of Sand Production Captured by an Analytical Model.....	355
E. Fjær and E. Papamichos	
Hydraulic Fracture Growth in Coal	369
R.G. Jeffrey and X. Zhang	
Representing a Rock Engineering System to Analyse Wellbore Instability Due to Fracture Reactivation	381
A. Younessi and V. Rasouli	
Section 5: Rock Mechanics Data	
Engineering Properties of Some Sedimentary Rocks at the Proposed Qomroud Tunnel Project Lot No. 7 in Iran.....	397
A. Shafiei and M.B. Dusseault	
Borehole Breakouts and In Situ Stresses	407
B. Shen	
Uncertainty in Rock Mass Jointing Characterisation	419
G. Lyman, G.V. Poropat and M. Elmouttie	
On the Need for Polyhedral Representation of Blocky Rock Masses.....	433
M. Elmouttie, G.V. Poropat and A. Guest	

Remote Characterisation of Surface Roughness of Rock Discontinuities	447
G.V. Poropat	

Section 6: Yielding Rock

Rock Physics, Geomechanics and Rock Properties in Shales – Where are the Links?.....	461
D.N. Dewhurst, A.F. Siggins, U. Kuila, M.B. Clennell, M.D. Raven and H.M. Nordgard-Bolas	
Nonlinear Elastic Behaviour of Bushveld Rock.....	475
J.S. Kuijpers, B.P. Watson and G. Henry	
Evaluation of Salt Cavern Closure Via FEM Code PLAXIS.....	487
G. Gjerapic and T.W. Thompson	

Section 7: Constitutive Relationships and Effective Characteristics

Comparison and Translation of Cap Models in Rock Mechanics	499
P.A. Fokker	
Quantitative Modelling of Granular Soils in Hypoplasticity	513
W. Huang and D. Sheng	
Revised Shear Strength Model for Soil-Infilled Rock Joints Considering Over-Consolidation Effect	523
B. Indraratna, D.A.F. Oliveira and M. Jayanathan	
The Acoustic Emission Response of Intact Quartzite Under Uniaxial Compression.....	533
W.J. Darlington, P.G. Ranjith, S.K. Choi and J. Kodikara	
Use of Velocity Tomography for CO ₂ Migration Monitoring in Sedimentary Rock Formation	543
X. Lei, Z. Xue and S. Karekal	
Sliding Crack Model for the Uniaxial Stress–Strain Curve of Rock.....	553
E. David, N. Brantut, A. Schubnel and R.W. Zimmerman	
Determining Properties of High Compliance Porosity by Use of an Effective Medium Model Based on Crack Description in Terms of Their Normal and Shear Compliance Parameters	563
V.Yu. Zaitsev and P. Sas	
On the Determination of Rock Anisotropy for Stress Measurements.....	575
P.M. Dight and A.V. Dyskin	
Crystallisation Preferred Orientation in Porous Media	587
B. Lecampion	
Determination of Effective Elastic Properties of Microcracked Rocks Based on Asymptotic Approximation	601
J.D. Zhao, S.W. Sloan and J.P. Carter	

Section 8: Wellbore Mechanics

A Novel Approach to Improve Wellbore Stability in Shale Through Rapid Chemoporoelastic Characterisation of Drill Cuttings	615
A.P. Bungler and E. Detournay	
Drilling Action of Roller-Cone Bits – Modelling and Experimental Validation	625
L.F. Franca and A. Mahjoob	
Constraining Pore Pressure Using Observations of Wellbore Breakouts in Shales – Case Studies in the Papua New Guinea Fold Belt Region.....	633
D.A. Castillo	
Author Index	641
