

26–28 November 2024 | The Westin Perth, Western Australia

Earlybird registration ends 17 October 2024

The series of International Conferences on Mine Closure is a fixture on the calendars of many mining professionals, providing topical and high-quality papers and presentations on a range of topics of immediate interest and relevance.

For the first time in five years, Mine Closure is returning to Perth.

A key feature of the conference series is the diversity of disciplines and expertise that come together to focus on the pressing issues facing the mine closure community globally.

## Conference Co-Chairs

### Professor Andy Fourie

Professor of Civil & Mining Engineering and Program Director – Future Tails  
The University of Western Australia

### Professor Mark Tibbett

Professor of Soil Ecology  
University of Reading, UK

EARLYBIRD REGISTRATION ENDS 17 OCTOBER 2024!

The series of International Conferences on Mine Closure is a fixture on the calendars of many mining professionals, providing topical and high-quality papers and presentations on a range of topics of immediate interest and relevance. A key feature of the conference series is the diversity of disciplines and expertise that come together to focus on the pressing issues facing the mine closure community globally.

#### THEMES

At Mine Closure 2024 we are taking a new approach to the conference format. This year we are focusing on the Mine Closure community within the framework of the UN Sustainable Development Goals (SDGs). As such, the UN SDGs will be a focus in our work. They are a call to action for governments and businesses to protect the planet and ensure that all people enjoy health, justice, and prosperity. These goals map closely to what good mine closure is all about. We are looking for abstracts that focus on the pressing issues facing the mine closure community globally. We are looking for abstracts that focus on the pressing issues facing the mine closure community globally.

- Stakeholders and communities
- Closure objectives and criteria
- Funding and cost estimation
- Reclamation and legacy management
- Landform and engineering design
- Surface water and erosion control
- Ecological reconstruction
- Statutory compliance
- Contaminant remediation and impact management

Visit [www.un.org/sustainabledevelopment/](https://www.un.org/sustainabledevelopment/) to learn more about the connection of mine closure to the UN Sustainable Development Goals.
